

DATABOOK TRS-4

(TACTICAL RAID SYSTEM)

N 2 G R O U P™

Introducing the DataBook TRS-4™ (Tactical RAID System) - N2 Group's latest product to support data in tactical deployments. The TRS-4 is a 4TB rugged, mobile RAID system utilizing the 3rd generation of the proven DataBookProV™ Ruggedized External Hard Drive, this powerful tool will be able to provide a rugged, lightweight, high capacity storage system with options to configure RAID levels 0, 5, 10 or JBOD for increased read/write speeds and data protection. Featuring new MISD™ (Multiple Input Signal Detection) technology for an easy connection to any host computer or network through a variety of interfaces. Packaged in a tough canvas bag for a total weight of less than 8 pounds, small and rugged enough to be deployed into any environment.

Features

- Supports RAID levels 0, 5, 10 and JBOD
- Capacities up to 4 Terabytes
- Hot-swappable drives for easy maintenance with no downtime.
- Rugged, environmentally sealed HDD enclosures.
- Lightweight - less than 8 pounds for extreme mobility.
- Compact size (10" x 6.5" x 7")
- Durable carrying case with handle and pocket for cables and accessories.
